OBJECTIVE

Artificial Intelligence & Data Science graduate with practical experience designing end-to-end full-stack applications and production-ready GenAI architectures. Proficient in **Python, modern web frameworks, LangChain, and hybrid search RAG pipelines (dense + sparse retrieval)**. Demonstrates strong software engineering fundamentals through building and deploying scalable, intelligent applications from scratch. Seeking an entry-level **Software Engineer, AI/ML Engineer, or Full-Stack Developer** role to deliver high-performance, maintainable software systems.

EDUCATION

Degree	Specialization	Institute	Year	GPA | Marks
B.Tech	*Artificial Intelligence and Data Science*	Vignan's Institute of Information Technology	2026	8.39/10
HSC BIEAP	*Physics, Chemistry, & Mathematics*	Narayana Junior College	2022	926/1000
SSC	*General*	Andhra High School	2020	565/600

PROJECTS

- **Local Hybrid RAG Q&A System** | **Link** *June - July 2026*

  Built a **local Retrieval-Augmented Generation (RAG) system** for document-based question answering using **hybrid BM25 + semantic retrieval**, **Reciprocal Rank Fusion (RRF)**, and optional cross-encoder reranking. Implemented citation-grounded responses with **Ollama** and an evaluation pipeline measuring **retrieval hit rate, Precision, faithfulness, and latency**.

- **Multi-Agent AI Research System** | **Link** *July - Aug 2026*

  Developed a **multi-agent AI research pipeline** that automates **web research, content extraction, report generation, and quality evaluation**. Implemented specialised Search, Reader, Writer, and Critic agents using **LangChain** and **Mistral AI**, with a sequential workflow for end-to-end research automation. Integrated **Tavily web search** and **BeautifulSoup-based web scraping** to retrieve recent information and extract relevant content from online sources. Built **LLM-powered** report generation and automated critique to improve factuality, structure, and overall research quality.

- **Password Manager - MERN Stack** | **Link** *Mar - April 2024*

  Built a full-stack password manager using **React.js**, **Node.js**, **Express.js**, and **MongoDB**, enabling users to create, view, edit, delete, and copy website credentials. Developed **REST APIs** and integrated MongoDB for persistent **CRUD** operations, with UUID-based identifiers, form validation, toast notifications, password visibility controls, and dark mode.

SKILLS

- **Programming:** Python, JavaScript, SQL
- **Web Development:** HTML, CSS, React.js, Node.js, Express.js, MongoDB
- **Generative AI :** LLMs, RAG, LangChain, ChromaDB, LangGraph
- **Tools & Platforms:** VS Code, Git, GitHub, Jupyter Notebook, Postman
- **Soft skills:** Communication, Problem-Solving, Teamwork

CERTIFICATIONS

- **Python Essentials 1:** Cisco Networking Academy **Link**
- **Python Essentials 2:** Cisco Networking Academy **Link**
- **Google AI Essentials:** Coursera **Link**
